

ABSTRACT

A print control apparatus 100 reducing the time needed for searching files and including a division unit 101a obtaining the print data 401 from outside the print control apparatus 100 and
5 dividing the print data 401 into division files 104a. The print control apparatus 100 also including a storage unit 104 that has an area storing the division files 104a, an R/W unit 101b writing the division files 104a obtained by the division unit 101a in the storage unit 104 and a file management unit 101c hierarchizing and
10 managing the plural division files 104a to be written in the storage unit 104 by the R/W unit 101b, and searching division files 104a based on the layers in a hierarchy.
